

ScribeAble SAAS

Complete Technical Blueprint & Production-Ready Codebase Documentation

Project Name	ScribeAble / ScribeConnect
Deployment Target	Vercel Serverless Function & CDN
Database Backend	Supabase PostgreSQL
Auth Abstractions	bcryptjs & JWT (jsonwebtoken)
Generated On	Friday, June 26, 2026

1. Project Overview & Directory Structure

ScribeAble is a fully accessible web application designed to connect students with disabilities to volunteer and paid exam scribes. The application is hosted as a serverless application on Vercel, integrating a Supabase PostgreSQL backend database for user management and secure authentication.

Directory Structure Blueprint

```
chinnu project/ ├── api/ | └─ index.js (Express serverless handler) └─ index.html  
(Application root page) └─ style.css (Global styling rules & themes) └─ script.js  
(Frontend accessibility, logic, & API calls) └─ server.js (Local development launcher)  
└─ vercel.json (Vercel function routing & configurations) └─ package.json (Node  
dependencies & engines) └─ supabase-schema.sql (Supabase SQL table initialization  
definitions)
```
